## **BARBER WEB SITE**

For my final project I will create a website for my barber business. I am a self employed barber and I need a website to connect more with my clients. The site will mainly be showcasing my abilities, allowing people to follow/contact me through social media and emails. I also will like for it to be a scheduling agent that allows clients to see my schedule and book appointments with me when I am available. I also want the site to give updates from my social media pages and show people when I decide to have events.
